

Introduction to ecological diversity measurements and ordination

Daniel Lundin

What is diversity?

Alpha diversity

- Species count – “richness”
- Abundance distribution – “evenness”
- Joint measurements – “entropy”

Richness: species count

Pielous's evenness

0.98

0.88

Shannon

1.4

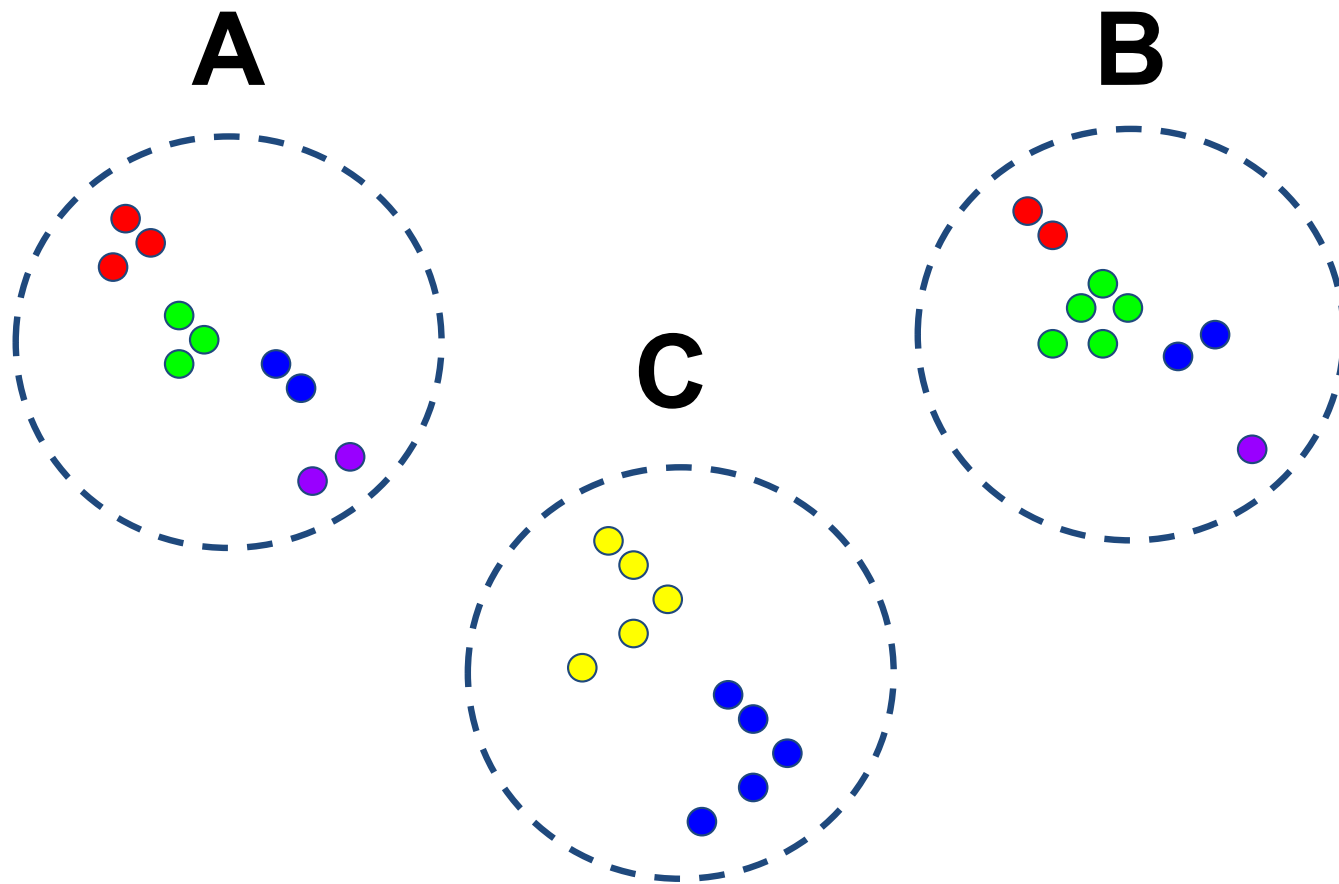

1.2

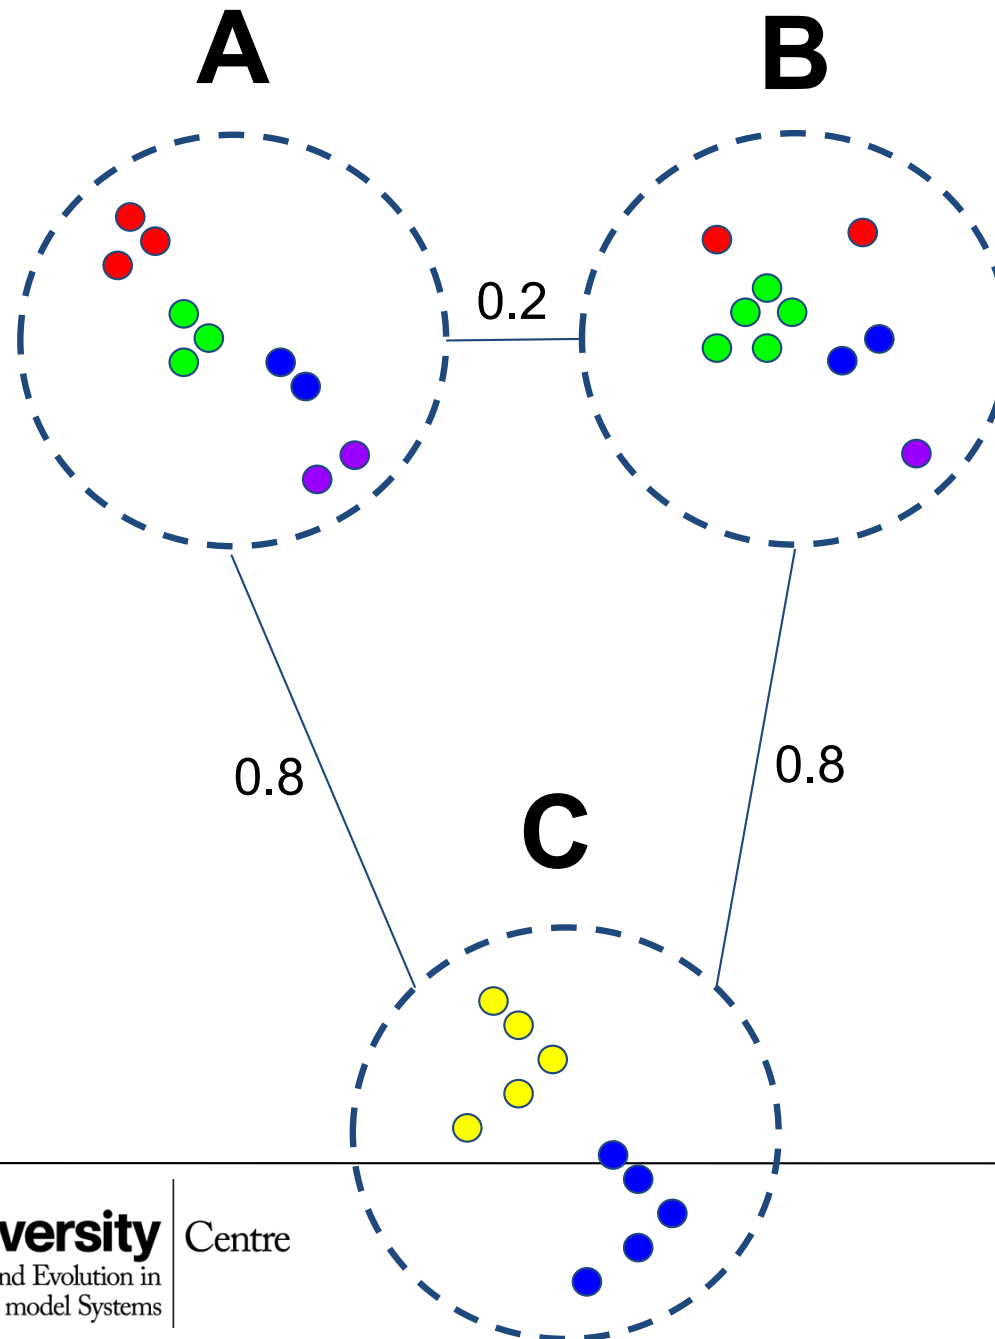

What happens if the total is different?

Beta diversity – how similar are A, B and C?

Bray-Curtis

Ordination

Control

Treatment 1

Treatment 2

Treatment 1+2
